

# Vehicle Styling Survey

---

## *Research Information Sheet*

### **Purpose of the study**

Aggressive driving is a significant safety issue. The researchers are trying to find if there is a relationship between vehicle styling and driving behaviors. In this part of the study we are determining whether people think some models of cars look aggressive or angry. Later parts of the study will investigate whether the appearance of cars affects the driving patterns of other drivers who see them.

### **Your Risks and Consent**

Eligibility: 18 years old

We anticipate that you have no risks from your participation in this study.

You may change your mind at any point and withdraw your form.

### **Results and additional information**

You may view relevant information at this link: <http://hobackas.faculty.udmercy.edu/driving/index.html>

Results will be posted after they have been analyzed.
